

CloccaCape™ Draping Instructions

- 1 To drape your client with CloccaCape, find the garment labels/care tags located on the right seam of the CloccaCape and place them on your clients' right shoulder. No matter what size your client may be, these tags are always located on the right shoulder.

- 2 With the magnetic neckline closure in your right hand, use your thumb to open, then place the neckline between the magnets, and release.

- 3 A. Pull the magnetic closure tab with your left hand while pulling the neckline with your right. This will tighten the neckline around the client. For smaller neckline sizes, view optional draping techniques.

B. Wrap the remaining neckline around your client, open the magnetic closure and secure it around the neckline as previously demonstrated.

- 4 Finally, pull the magnetic closure tab with your right hand to adjust tension of neckline around your client. With a "collar tight" fit around your client, our silicone rubber neckline cinches comfortably allowing for a debris free salon experience!

- 5 **OPTIONAL TECHNIQUES**
For smaller neckline sizes, continue wrapping neckline around your client and secure as visually demonstrated. For a perfect 12" neck size, our magnets snap together without having to secure it around the neckline.

- 6 With CloccaCapes unique "cloak" draping design, the seam is now in the front of the cape. This allows for a blank working "canvas" without the possibility of cutting your cape. With our longer draping design, tuck a section of cape behind your client and smooth out to eliminate any draping folds.
